

Dear iSeries Customer,

As part of your software shipment you have received a Keyed Products CD set containing some of the most popular iSeries software. This software enables 70 day use for internal evaluation, testing, or demonstration purposes on a 'try and buy' basis. Please see the enclosed IBM International License Agreement for Evaluation of Programs (GC19-5502) for further information.

If you are interested in licensing additional software on the Keyed Products CD set, contact your IBM representative to place an order. Software License Keys to enable the products to run beyond the 70 day evaluation period will be sent to you along with the appropriate documentation.

For additional information on the contents of your product CD set, please see the enclosed Information Center CD (SK3T-4091), refer to article 'Managing software and licensed programs', or your Software Installation Guide (SC41-5120).

Keyed Product Media List:

5722-AF1 AFP Utilities for iSeries	5722-PT1 Performance Tools for iSeries
